TECHNICAL SKILLS

Languages: Dart, Python, C++, C

Frameworks & Platforms: Flutter, Firebase, FastAPI, Django, Linux, LLM-based Systems

Cloud & DevOps Tools: AWS (EC2, Load Balancer), CI/CD Pipelines, NGINX, Keycloak

Developer Tools: Git, VS Code, Zed, Opencode

Libraries & Technologies: Riverpod, Provider, Dio, Freezed, GoRouter, Hive

Deployment & Release: App Store & Play Store deployment, Release Management, beta testing

EXPERIENCE

Flutter Developer

Dec 2024 – Present

Cloud Harbor Technologies

Remote

- Led a team to build and scale a **SaaS platform** comprising **8+ mobile and 16+ web applications**, ensuring consistent and reliable user experiences across clients.
- Built an in-app **real-time chat system** using WebSockets and Slack webhooks to enable seamless communication across all apps and platforms.
- Designed and deployed **Python (FastAPI, Django) microservices** with modular APIs, optimized for **low-latency, evaluation-style workflows** and clean service boundaries.
- Managed infrastructure using **AWS EC2**, configured CI/CD pipelines, and served all services using **NGINX reverse proxy**.
- Led end-to-end ownership across **feature planning, architecture, code reviews, and deployment**, ensuring reliability of distributed systems.
- Designed and implemented over **120 unique UI screens** and integrated more than **180 REST APIs** across multiple apps.

Flutter Developer

Feb 2023 – Nov 2024

FantasySquad.in

Remote

- Contributed to the frontend development of a **tours and travel mobile application** using Flutter.
- Designed and implemented responsive, user-friendly UI components to enhance the overall user experience.
- Collaborated with the design and backend teams to ensure seamless integration of features and performance optimization.

PROJECTS

Polyphasic Sleep App | *Flutter, Dart*

- Developed a cross-platform mobile application to help users adopt and manage polyphasic sleep schedules, improving productivity through optimized sleep cycles.
- The app provides customizable sleep patterns, smart alarms, and personalized themes.

Chatty App (Real-time Communication Platform) | *Flutter, Dart, WebRTC, WebSockets, Golang*

- Built a cross-platform system with **real-time messaging and streaming** using WebSockets and WebRTC, optimized for **low-latency state updates**.
- Designed UI systems capable of handling **continuous data flow and state synchronization**, relevant to interactive evaluation environments.
- Implemented **event-driven communication patterns** and optimized rendering for real-time data streams.
- Collaborated with backend services (Golang, gRPC) to maintain **efficient data pipelines and communication protocols**.

EDUCATION

ABES Engineering College

Bachelor of Technology in Computer Science

Ghaziabad, U.P, India

2019 – 2023
